

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) P VAUCHER, [Jean Pierre Étie]^{me} and LECLERC [?]

Title Observations sur les conferves.

Abbreviated reference ~~Arch. Découv. Invent. Nouv. [9] pendant l'année 1816: 34-35. 1817.~~

Arch. Découv. Invent. Nouv. 1816: 34-35. 1817

MLP 226 A

Notes The authors say that the algae which covers and fills stagnant water could be classed with the animal kingdom. Its mass of filaments compared with hair. Mention of the reproduction stages of algae; also that it should not be confused with a parasite which is similar to it. Augustin Nicaise Desvaux has called the genus cyrtinus.
