Notes

^{Translated}

Extract of a letter from Webb, communicated to the Asiatic Society of Calcutta by N. Wallich, 8 July, 1818, on the height of the Himalayas which also gives some account of the vegetation at different heights.

Around Meloum - conysa squarrosa, from Meloum travelling to Tibet, at 11,630 ft., oak, pine, rhododendrons. At 12,642 ft., strawberries, taraxacum, ranunculas and other small flowers, not named.
